GETTING INTO THE PROJECT:

Hospital Management System in php and mysql. This system has a 'Home' page from where the patient, doctor & administrator can login into their accounts by toggling the tabs accordingly. Fig 1.1 shows the 'Home' page of our project.

Fig 1.3

The 'Home' page consists of 3 modules:

1. Patient Module

2. Doctor Module

3. Admin Module

Patient Module:

This module allows patients to create their account, book an appointment to see a doctor and see their appointment history. The registration page(in the home page itself) asks patients to enter their First Name, Last Name, Email ID, Contact Number,
